

# Casa Catalog - Release Version 3.0

## New Features:

### Discovery Page Added

- Users can search for items in the search bar and will display the results in a card format with an image, price, URL, and link to the product in Ebay's website.
- Users are automatically shown unique products on page if nothing is searched for.
- Users can also "Add items to watchlist" where specific products marked will be displayed on their price watchlist page.

### Watchlist Page Added

- Items the user has marked for price watching will appear on the watchlist page now.
- On this page users can "Buy" items and be directed to the Ebay page to make purchases.
- Users can update their "Watch Price" on the page where they indicate a price they would like to be notified if the item specified reaches.
- If no "Watch Price" is set, the items in the watchlist will automatically be set to 2% less than the listed item price.
- All watchlist elements are unique to each user. Multiple users can simultaneously add and remove items from the list and will accurately display correct elements when later logged in.

## Enhancements:

- Navigation Bar updated with correct links and titles to new pages added.
- Navigation Bar design updated with sleeker button design.
- Discover page button additions and redesigns, added hovering effect for items selected.
- Watchlist design changes, color scheme shifts, formatting updates.
- Homepage stylistic adjustments, high quality image additions, page descriptions.

## Bug Fixes:

- Updated issue with images not showing up on registration and login page.
- Updated issue with certain links being broken or not responding.
- Fixed issue with search results not correctly being displayed on Discover Page.
