

# Casa Catalog - Release Version 4.0

## New Features:

- Added updating Navigation bar that alters what links are available depending on if user is not logged in.
- Updated home page with user testimonials.
- Github repository linked to footer.
- Price updating occurs when a user logs in.

## Bug Fixes:

- Fixed footer to remain at the bottom of the page even with varying container sizes.
- Fixed issue with navbar causing the user session to crash after a failed login.

## Enhancements:

- Added style changes to the watchlist and notification page to better match the theme of the rest of the application.
- Added more accurate photos to the front page of the website, and updated the carousel as well.
- Added successful messages after watchlist items have been updated, added welcome message to the discover page as well.
- Updated notification page style.
- Card sizes now are even on the discover page.
